Sandell's Rigid Masonry Anchors

Sandell's Rigid Masonry Anchors play an intricate role in commercial and industrial construction. They must be strong enough to support high bearing pressure, yet manageable for ease of installation. Masonry is unforgiving, and the proper selection of a stone anchor is eminently important to a structures well being.

Sandell's Rigid Masonry Anchors can be easily customized to your specifications. Special bends, openings, and twists etc. can all be implemented based upon the customers request.

Sizes:

- ◆ 1/8: L or Z shaped
- ◆ 2" wide for heavier duty stone weight
- ◆ Custom sizes 1/8" x 3/8" thick
- ◆ Custom 1/8" to 3/8" thick, widths up to 3"
