

SANDELL'S FLASH GUARD™ & FLASH GUARD™ NA

FLASH GUARD –

Product Description:

Copper Flash-Guard is a distinctive, affordable - and a great termite shield. It's light-weight, flexible and easy to work with. An effective moisture barrier, it is compatible with ACQ and all other treatments for pressure treated wood. Its backing is laminated with waterproof adhesive for high performance. This is a cost-effective alternative to heavy-gauge 16 oz. decorative copper flashing will all the beauty and performance.

Available in:

- ❖ 2 oz or 3 oz copper 8", 10" or 12" widths
- ❖ 20' pr 60' rolls Custom Sizing Available

Installation:

Install Sandell's Flash Guard NA™ between the foundation and the sill plate with the copper side up. The foundation and sill surfaces should be as smooth as is practical to avoid puncturing the barrier during installation. Cut pieces as long as possible to minimize joints. Lap joints 6" to ensure there are no gaps that could enable termite access. The edge of flashing should extend approximately 2" beyond the edge of the foundation, and turned down at a 45° angle.

It is recommended that all penetrations and laps are sealed with mastic or caulk, as termites require as little as 1/64" to gain access.

FLASH GUARD NA –

Product Description:

Sandell's Flash Guard NA™ is a reliable, weather resistant deck flashing & termite shield. It is ACQ compatible with a polymer backing that acts as an isolation barrier between dissimilar metals preventing galvanic corrosion. Sandell's Flash Guard NA™ is non-Apshaltic and there is no risk of staining, it will not delaminate in extreme heat, cold or moisture. It can be easily cut and bent to form around corner and columns. The copper is flexible, easily formed on-site and the rubberized laminate offers excellent protection from the chemically treated wood.

Available in:

- ❖ 2 oz or 3 oz copper 8", 10" or 12" widths
- ❖ 20' pr 60' rolls Custom Sizing Available
