

**SANDELL'S PRE-FORMED METAL CORNERS & END DAMS**

**Product Name:**  
Sandell's Pre-formed Metal Corners

**Product Description:**  
Sandell®'s Pre-Formed Metal Corners are used to secure structural integrity by creating a moisture barrier that upholds a watertight environment. Sandell®'s Pre-Formed Metal Corners are seamless, durable and best of all simple to use. They are pre-formed, which means no cutting, bending or forming on the jobsite. This priceless feature, along with the products many other amenities, adds to the value that this product has to offer to the consumer. The ease of use and expedient installation process delivers a cost effective system with substantial savings.

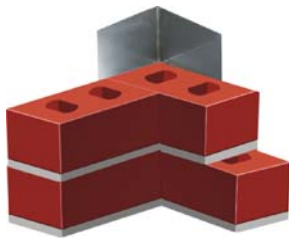

**Composed of:**

- ❖ Copper: 10oz., 12oz., 16oz., and 20oz.
- ❖ Stainless Steel: 26 and 28 Gauge

**Use:**  
Sandell's Pre-Formed Metal Corners are installed by setting in place and overlapping with flashing.

**Warranty:**  
Sandell's Pre-Formed Metal Corners carry a manufacturer's warranty of material specification compliance.

**Maintenance:**  
Sandell's Pre-Formed Metal Corners should not require maintenance if installed in accordance with Sandell specifications and instructions.

End Dam

Corners

**Product Name:**  
Sandell's Metal End Dams

**Product Description:**  
Sandell's Metal End Dams are used in conjunction with flashing and other waterproofing accessories. They are used to insure moisture protection, by prohibiting the movement of water. As with flashing, they direct moisture to the exterior of the structure.

**Composed of:**

- ❖ Copper: 10oz., 12oz., 16oz., and 20oz.
- ❖ Stainless Steel: 26 and 28 Gauge

**Use:**  
Sandell's Metal End Dams are used to prevent horizontal water movement within a structure, above and beneath wall openings (corners and nearby jamb lines). They are specifically designed to deter moisture by diverting it to the exterior of the building. Sandell's End Dams should be installed, at longitudinal ends of flashing, over lintels, at column abutments, near building expansion joints, or when flashing interruptions occur.

**Warranty:**  
Sandell's Metal End Dams carry a manufacturer's warranty of material specification compliance.

**Maintenance:**  
Sandell's End Dams should not require maintenance if installed in accordance with Sandell specifications and instructions.
