

Sandell's Veneer Anchors & Triangle Ties

Product:
Sandell's Veneer Anchors & Triangle Ties

Product Description:
Sandell's Veneer Anchors and Triangles Ties are used to secure brick veneer to metal stud, concrete, masonry and wood backup walls. They transfer loads between the brick and the structural framing of the building, and are adjustable, which allows for large differential movements.

Product Uses:
Sandell's Veneer Anchors & Triangle Ties permit the construction of interior masonry wythes and other backings prior to the construction of exterior facing wythes, thus allowing the structure to be enclosed faster. Sandell's Veneer Anchors & Triangle Ties consist of a two piece system that can accommodate most construction tolerances common in multi-material construction.

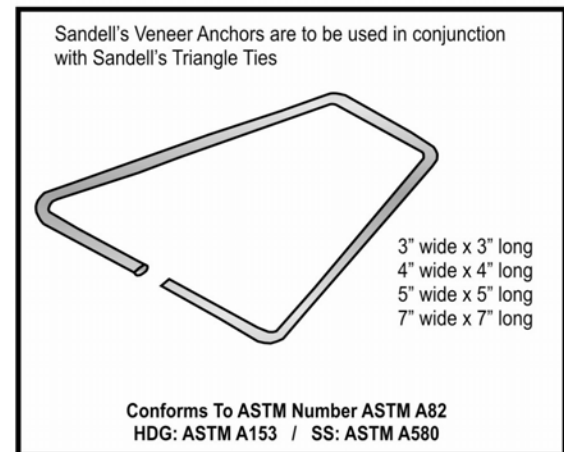

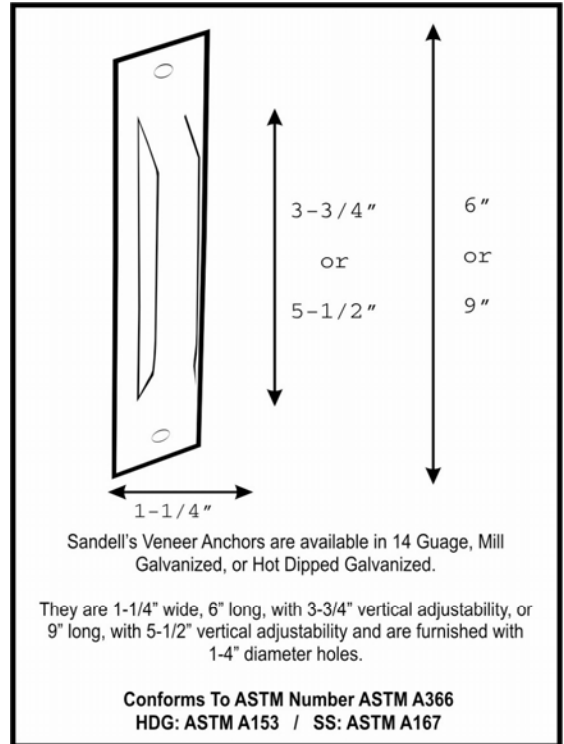

- Available In:**
- ❖ Hot Dip Galvanized
 - ❖ Mill Galvanized
 - ❖ Stainless Steel

Maintenance:
Sandell's Veneer Anchors & Triangle Ties should not require maintenance if installed in accordance with Sandell's specifications and instructions.
